**Edison, NJ, September 13, 2007:**

The Musculoskeletal Transplant Foundation (“MTF”), the nation’s largest tissue bank, and LPiT Solutions Inc., the creator and provider of Tissue TrackCore, tissue tracking and compliance software, announced today that they have entered into an exclusive development and distribution agreement. The two companies will work together to develop an enhanced version of software specifically for MTF customers.

Don Larson, Vice President of Sales for MTF, stated, “JCAHO compliance is an integral part of a healthcare organization’s operations and as part of that effort the tracking of tissue is a growing concern. We are pleased to partner with LPiT to help MTF customers meet federal compliance requirements, as well as reduce the time and costs associated with effective tissue tracking.”

John Post, President of LPiT Solutions Inc, stated, “Being selected to partner with MTF provides us with an exciting opportunity to present our Tissue TrackCore software to all of the MTF customers that are looking for a Tissue Tracking Compliance Software Solution. Tissue TrackCore is the “Best in Class” solution in the marketplace and the only Joint Commission Resources, Inc ([www.jcrinc.com](http://www.jcrinc.com)) reviewed solution available.”

Tissue TrackCore helps customers effectively track tissue inventory and utilization while complying with Federal standards. LPiT partnered with clinical professionals in the development of Tissue TrackCore from inception to completion. The software was designed specifically to be easy to use, cost-effective, and to ensure a high-rate of accuracy – all of which help to improve the safety of patients.
